TPATH in January

Wow, despite everything, 2020 was an incredibly productive year for TPATHer. On the whole we published at least 54 academic articles, 6 books, 5 book chapters, 4 editorials and 4 reports this year. And those are just the ones that came across my desk. Looking at the last two months, TPATH members are responsible for 14 academic articles, 1 book, 1 report, and 1 editorial. We were also well-represented at the recently concluded WPATH conference. You can even see a couple of our member’s presentations. I think we can all take a moment to appreciate our work surviving (and thriving) over the course of what has been an incredibly difficult and challenging year.

TPATH is now well into planning our first ever conference (to be held virtually), tentatively scheduled for summer 2021. Please check out the website for information on the Steering Committee and the conference theme.

The News section this month contains, in addition to a number of other articles on global transgender healthcare, a very interesting short video on grey market access to hormones in China and a piece on Argentina’s newly announced commitment to create a “1% employment quota for transgender people in the public sector.” Also, check out Simon Strikeback’s request for people to join the Queer Parents Discussion Writing Group.

As always, let us know if you see any errors, or with news, job postings, publications, and anything else you’d like to see here or on the member resources section of the website. Don’t forget to join our Listserv if you’d like to get this newsletter direct to your inbox.
